1446 *Journal of Interpersonal Violence 26(8)*

and the fact that the majority of the women who were interviewed had been sexually abused by a family member, the authors suggest that the findings of this study may be generalizable to other populations of women who have experienced sexual violence.

Overall, the findings of this study suggest that the experience of sexual violence is a complex and multifaceted phenomenon that can have a profound impact on the lives of women. The authors suggest that further research is needed to explore the long-term effects of sexual violence on women's lives and to develop effective interventions to support women who have experienced sexual violence.

Architectural elevation drawing of a residential block. The drawing shows a long, multi-story building facade with a grid of windows and doors. The facade is divided into vertical sections by columns. The drawing includes a title block on the right side with the text "ELEVATION (RESIDENTIAL BLOCK-D)" and "1:100". There are also two small text boxes on the right side containing technical specifications. The drawing is oriented vertically on the page.

ELEVATION (RESIDENTIAL BLOCK-D)

[illegible][illegible]
