QUESTION 1 (10 marks) (100%)

Let $f: \mathbb{R} \rightarrow \mathbb{R}$ be a function defined by $f(x) = x^2 + 2x + 1$. Find the minimum value of $f(x)$ for $x \in \mathbb{R}$.

SOLUTION

Let $f(x) = x^2 + 2x + 1$. Then $f'(x) = 2x + 2$. Setting $f'(x) = 0$, we get $2x + 2 = 0$, which implies $x = -1$. Since $f''(x) = 2 > 0$, f has a local minimum at $x = -1$. The minimum value of f is $f(-1) = (-1)^2 + 2(-1) + 1 = 0$.

```

// 1. Create a new array and fill it with random numbers
// 2. Sort the array in ascending order
// 3. Print the array
// 4. Print the sum of all elements in the array
// 5. Print the average of all elements in the array
// 6. Print the maximum and minimum values in the array
// 7. Print the range of the array (max - min)
// 8. Print the standard deviation of the array
// 9. Print the variance of the array
// 10. Print the coefficient of variation of the array

```

1. What is the purpose of the study?
 2. What is the research question?
 3. What is the hypothesis?
 4. What is the significance of the study?

1. **What is the purpose of the study?**
 2. **What are the research objectives?**
 3. **What is the research methodology?**
 4. **What are the results of the study?**
 5. **What are the conclusions of the study?**

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, gather relevant information and resources. This may include researching existing knowledge, consulting experts, or collecting data.

3. Once the information is gathered, it is important to analyze it carefully. This involves identifying patterns, trends, and potential solutions.

4. After analysis, a plan should be developed. This plan should outline the steps that need to be taken to solve the problem or answer the question.

5. The final step is to implement the plan. This involves carrying out the steps outlined in the plan and monitoring progress along the way.

6. Once the plan is implemented, it is important to evaluate the results. This involves comparing the actual outcomes with the expected outcomes and identifying any areas for improvement.

7. Finally, the results should be communicated. This involves sharing the findings with the relevant stakeholders and providing recommendations for future action.
