Sub: Proof checking of the design & drawing of Proposed Residential "EWS", Aditya Wordcity at NH-24, Ghaziabad

Sir,

This is to certify herewith that the structural design & drawing of Proposed Residential "EWS", Aditya Wordcity at NH-24, Ghaziabad, have been checked and found to be conforming to the codes of practice as per the relevant Indian/other standards on the basis of design data supplied by Keen Associates Pvt. Ltd.

All the stipulated combinations of gravity loads and the relevant lateral loads have been considered and are duly incorporated in the analysis and design. However, as the proposed extension is on an existing structure, the strength evaluation of the existing structure for extension has not been checked and out of the scope of the work. Signed structural drawings and design report have been checked for design as well as detailing.

The responsibility of the Indian Institute of Technology shall be limited to checking of structural design calculations and drawings only. All procedural/legal/operational matters and architectural/functional details will be the responsibility of the owner. It is expected to use specified material grades, proper quality control and construction practices. However, it may be noted that the assurance on quality control is not within the scope of the proof check.

Thank you

Sincerely

(Dr. Rajib Chowdhury)
