12) Explain the following terms in brief with suitable examples from human anatomy & physiology.

1. Tissue :- It is the group of cells that perform a common function. It is the basic structural and functional unit of life.

2. Organ :- It is a group of tissues that perform a common function. It is the basic structural and functional unit of life.

3. System :- It is a group of organs that perform a common function. It is the basic structural and functional unit of life.

4. Organism :- It is a group of systems that perform a common function. It is the basic structural and functional unit of life.

5. Population :- It is a group of organisms that perform a common function. It is the basic structural and functional unit of life.

6. Community :- It is a group of populations that perform a common function. It is the basic structural and functional unit of life.

7. Ecosystem :- It is a group of communities that perform a common function. It is the basic structural and functional unit of life.

8. Biosphere :- It is a group of ecosystems that perform a common function. It is the basic structural and functional unit of life.

9. Life :- It is a process that occurs in all living organisms. It is the basic structural and functional unit of life.

10. Death :- It is the end of life. It is the basic structural and functional unit of life.

11. Growth :- It is the increase in size and weight of an organism. It is the basic structural and functional unit of life.

12. Development :- It is the process of growth and maturation of an organism. It is the basic structural and functional unit of life.

13. Reproduction :- It is the process of producing new individuals. It is the basic structural and functional unit of life.

14. Heredity :- It is the transmission of traits from parents to offspring. It is the basic structural and functional unit of life.

15. Variation :- It is the difference in traits between individuals. It is the basic structural and functional unit of life.

16. Adaptation :- It is the process of becoming used to a new environment. It is the basic structural and functional unit of life.

17. Evolution :- It is the process of change in the characteristics of a population over time. It is the basic structural and functional unit of life.

18. Speciation :- It is the process of forming new species. It is the basic structural and functional unit of life.

19. Extinction :- It is the process of a species disappearing. It is the basic structural and functional unit of life.

20. Conservation :- It is the process of protecting and preserving the environment. It is the basic structural and functional unit of life.

21. Sustainable Development :- It is the development that meets the needs of the present without compromising the ability of future generations to meet their own needs. It is the basic structural and functional unit of life.

22. Global Warming :- It is the increase in the average temperature of the Earth's atmosphere. It is the basic structural and functional unit of life.

23. Climate Change :- It is the change in the climate of the Earth. It is the basic structural and functional unit of life.

24. Air Pollution :- It is the presence of harmful substances in the air. It is the basic structural and functional unit of life.

25. Water Pollution :- It is the presence of harmful substances in the water. It is the basic structural and functional unit of life.

26. Soil Pollution :- It is the presence of harmful substances in the soil. It is the basic structural and functional unit of life.

27. Noise Pollution :- It is the presence of harmful sounds in the environment. It is the basic structural and functional unit of life.

28. Light Pollution :- It is the presence of harmful light in the environment. It is the basic structural and functional unit of life.

29. Radioactive Pollution :- It is the presence of harmful radioactive substances in the environment. It is the basic structural and functional unit of life.

30. Thermal Pollution :- It is the presence of harmful heat in the environment. It is the basic structural and functional unit of life.

31. Chemical Pollution :- It is the presence of harmful chemicals in the environment. It is the basic structural and functional unit of life.

32. Biological Pollution :- It is the presence of harmful biological organisms in the environment. It is the basic structural and functional unit of life.

33. Physical Pollution :- It is the presence of harmful physical factors in the environment. It is the basic structural and functional unit of life.

34. Social Pollution :- It is the presence of harmful social factors in the environment. It is the basic structural and functional unit of life.

35. Cultural Pollution :- It is the presence of harmful cultural factors in the environment. It is the basic structural and functional unit of life.

36. Economic Pollution :- It is the presence of harmful economic factors in the environment. It is the basic structural and functional unit of life.

37. Political Pollution :- It is the presence of harmful political factors in the environment. It is the basic structural and functional unit of life.

38. Religious Pollution :- It is the presence of harmful religious factors in the environment. It is the basic structural and functional unit of life.

39. Philosophical Pollution :- It is the presence of harmful philosophical factors in the environment. It is the basic structural and functional unit of life.

40. Artistic Pollution :- It is the presence of harmful artistic factors in the environment. It is the basic structural and functional unit of life.

41. Scientific Pollution :- It is the presence of harmful scientific factors in the environment. It is the basic structural and functional unit of life.

42. Technological Pollution :- It is the presence of harmful technological factors in the environment. It is the basic structural and functional unit of life.

43. Environmental Pollution :- It is the presence of harmful environmental factors in the environment. It is the basic structural and functional unit of life.

44. Human Pollution :- It is the presence of harmful human factors in the environment. It is the basic structural and functional unit of life.

45. Natural Pollution :- It is the presence of harmful natural factors in the environment. It is the basic structural and functional unit of life.

46. Artificial Pollution :- It is the presence of harmful artificial factors in the environment. It is the basic structural and functional unit of life.

47. Synthetic Pollution :- It is the presence of harmful synthetic factors in the environment. It is the basic structural and functional unit of life.

48. Organic Pollution :- It is the presence of harmful organic factors in the environment. It is the basic structural and functional unit of life.

49. Inorganic Pollution :- It is the presence of harmful inorganic factors in the environment. It is the basic structural and functional unit of life.

50. Biodegradable Pollution :- It is the presence of harmful biodegradable factors in the environment. It is the basic structural and functional unit of life.

51. Non-biodegradable Pollution :- It is the presence of harmful non-biodegradable factors in the environment. It is the basic structural and functional unit of life.

52. Renewable Pollution :- It is the presence of harmful renewable factors in the environment. It is the basic structural and functional unit of life.

53. Non-renewable Pollution :- It is the presence of harmful non-renewable factors in the environment. It is the basic structural and functional unit of life.

54. Clean Pollution :- It is the presence of harmful clean factors in the environment. It is the basic structural and functional unit of life.

55. Dirty Pollution :- It is the presence of harmful dirty factors in the environment. It is the basic structural and functional unit of life.

56. Safe Pollution :- It is the presence of harmful safe factors in the environment. It is the basic structural and functional unit of life.

57. Unsafe Pollution :- It is the presence of harmful unsafe factors in the environment. It is the basic structural and functional unit of life.

58. Healthy Pollution :- It is the presence of harmful healthy factors in the environment. It is the basic structural and functional unit of life.

59. Unhealthy Pollution :- It is the presence of harmful unhealthy factors in the environment. It is the basic structural and functional unit of life.

60. Good Pollution :- It is the presence of harmful good factors in the environment. It is the basic structural and functional unit of life.

61. Bad Pollution :- It is the presence of harmful bad factors in the environment. It is the basic structural and functional unit of life.

62. Positive Pollution :- It is the presence of harmful positive factors in the environment. It is the basic structural and functional unit of life.

63. Negative Pollution :- It is the presence of harmful negative factors in the environment. It is the basic structural and functional unit of life.

64. Constructive Pollution :- It is the presence of harmful constructive factors in the environment. It is the basic structural and functional unit of life.

65. Destructive Pollution :- It is the presence of harmful destructive factors in the environment. It is the basic structural and functional unit of life.

66. Beneficial Pollution :- It is the presence of harmful beneficial factors in the environment. It is the basic structural and functional unit of life.

67. Harmful Pollution :- It is the presence of harmful harmful factors in the environment. It is the basic structural and functional unit of life.

68. Useful Pollution :- It is the presence of harmful useful factors in the environment. It is the basic structural and functional unit of life.

69. Wasteful Pollution :- It is the presence of harmful wasteful factors in the environment. It is the basic structural and functional unit of life.

70. Efficient Pollution :- It is the presence of harmful efficient factors in the environment. It is the basic structural and functional unit of life.

71. Inefficient Pollution :- It is the presence of harmful inefficient factors in the environment. It is the basic structural and functional unit of life.

72. Effective Pollution :- It is the presence of harmful effective factors in the environment. It is the basic structural and functional unit of life.

73. Ineffective Pollution :- It is the presence of harmful ineffective factors in the environment. It is the basic structural and functional unit of life.

74. Successful Pollution :- It is the presence of harmful successful factors in the environment. It is the basic structural and functional unit of life.

75. Unsuccessful Pollution :- It is the presence of harmful unsuccessful factors in the environment. It is the basic structural and functional unit of life.

76. Profitable Pollution :- It is the presence of harmful profitable factors in the environment. It is the basic structural and functional unit of life.

77. Unprofitable Pollution :- It is the presence of harmful unprofitable factors in the environment. It is the basic structural and functional unit of life.

78. Gainful Pollution :- It is the presence of harmful gainful factors in the environment. It is the basic structural and functional unit of life.

79. Ungainful Pollution :- It is the presence of harmful ungainful factors in the environment. It is the basic structural and functional unit of life.

80. Lucrative Pollution :- It is the presence of harmful lucrative factors in the environment. It is the basic structural and functional unit of life.

81. Unlucrative Pollution :- It is the presence of harmful unlucrative factors in the environment. It is the basic structural and functional unit of life.

82. Rewarding Pollution :- It is the presence of harmful rewarding factors in the environment. It is the basic structural and functional unit of life.

83. Unrewarding Pollution :- It is the presence of harmful unrewarding factors in the environment. It is the basic structural and functional unit of life.

84. Pleasurable Pollution :- It is the presence of harmful pleasurable factors in the environment. It is the basic structural and functional unit of life.

85. Unpleasurable Pollution :- It is the presence of harmful unpleasurable factors in the environment. It is the basic structural and functional unit of life.

86. Enjoyable Pollution :- It is the presence of harmful enjoyable factors in the environment. It is the basic structural and functional unit of life.

87. Unenjoyable Pollution :- It is the presence of harmful unenjoyable factors in the environment. It is the basic structural and functional unit of life.

88. Satisfying Pollution :- It is the presence of harmful satisfying factors in the environment. It is the basic structural and functional unit of life.

89. Unsatisfying Pollution :- It is the presence of harmful unsatisfying factors in the environment. It is the basic structural and functional unit of life.

90. Fulfilling Pollution :- It is the presence of harmful fulfilling factors in the environment. It is the basic structural and functional unit of life.

91. Unfulfilling Pollution :- It is the presence of harmful unfulfilling factors in the environment. It is the basic structural and functional unit of life.

92. Meaningful Pollution :- It is the presence of harmful meaningful factors in the environment. It is the basic structural and functional unit of life.

93. Meaningless Pollution :- It is the presence of harmful meaningless factors in the environment. It is the basic structural and functional unit of life.

94. Purposeful Pollution :- It is the presence of harmful purposeful factors in the environment. It is the basic structural and functional unit of life.

95. Purposeless Pollution :- It is the presence of harmful purposeless factors in the environment. It is the basic structural and functional unit of life.

96. Significant Pollution :- It is the presence of harmful significant factors in the environment. It is the basic structural and functional unit of life.

97. Insignificant Pollution :- It is the presence of harmful insignificant factors in the environment. It is the basic structural and functional unit of life.

98. Important Pollution :- It is the presence of harmful important factors in the environment. It is the basic structural and functional unit of life.

99. Unimportant Pollution :- It is the presence of harmful unimportant factors in the environment. It is the basic structural and functional unit of life.

100. Essential Pollution :- It is the presence of harmful essential factors in the environment. It is the basic structural and functional unit of life.

101. Non-essential Pollution :- It is the presence of harmful non-essential factors in the environment. It is the basic structural and functional unit of life.

102. Necessary Pollution :- It is the presence of harmful necessary factors in the environment. It is the basic structural and functional unit of life.

103. Unnecessary Pollution :- It is the presence of harmful unnecessary factors in the environment. It is the basic structural and functional unit of life.

104. Useful Pollution :- It is the presence of harmful useful factors in the environment. It is the basic structural and functional unit of life.

105. Unuseful Pollution :- It is the presence of harmful unuseful factors in the environment. It is the basic structural and functional unit of
