1. **Identify the problem.** The problem is that the company is not meeting its production goals.

2. **Analyze the problem.** The problem is caused by a combination of factors, including a lack of resources, poor management, and outdated equipment.

3. **Develop a solution.** The solution is to increase resources, improve management, and update equipment.

4. **Implement the solution.** The solution is implemented by hiring new staff, training existing staff, and purchasing new equipment.

5. **Evaluate the solution.** The solution is evaluated by monitoring production levels and comparing them to the goals.

6. **Conclusion.** The solution is successful in meeting the production goals.
