

**NOTE**

1. For all diameters, up to an average depth 120 CM, width of trench in CM = diameter + of pipe + 30 CM.
2. For all diameters, up to an average depth above 120 CM, width of trench in CM = diameter + of pipe + 40 CM.
3. Notwithstanding (1) and (2) the total width of trench shall not be less than 75 cm for depths exceeding 90 cm.

**PLAN & SECTION Z-Z FOR STORM WATER MANHOLE**
