

[illegible][illegible][illegible]

First, address any other matters of concern or importance to the audience, such as the need for more research on the topic, the importance of the topic, and the need for more funding. Then, address the specific topic of the presentation. Use the same structure as the previous presentation, with a clear introduction, a main body, and a conclusion. Use the same language and tone as the previous presentation, and use the same visual aids and references. Finally, thank the audience for their attention and provide contact information for further inquiries.

On the 17th of June 1891, the following was received from the Hon. the Secretary of the War Office, London:

[illegible][illegible][illegible][illegible][illegible]

single Pictures/Apple emblem

(उपरोक्त पैजा-13.1)

requirements for the following Indian Standards, Codes and Guidelines and other detrimental trends to be observed for structural safety and natural hazard protection of buildings are:

3. IS 456 : 2000 "Standard Institution of Standards Institution, September 2000" Indian IS : 800 - 1984.
4. IS 883 : 1984 "Code of Practice for general Construction in Steel" Indian Standards Institution, February, 1985
5. IS : 883 - 1 : 66 "Code of Practice for Design of Structural Timber in Building" Indian Standards Institution, March, 1967
6. IS 875 (Part 2) : 1987 "Code of Practice for design loads, other than earthquake for building and structures : Part 2. Imposed loads (General)" Indian Standards Institution, February, 1988
7. IS 875 (Part 3) : 1988 "Code of Practice for design loads, other than earthquake for building and structures : Part 3. Wind loads (General)" Indian Standards Institution, February, 1988

- a) example) for building and structures : Part 3 Wind loads (Second edition)
8. IS 875 (Part 5) : 1987 "Code of Practice for design loads (other than earthquake) for building and structures : Part 5 Special loads and load combinations (Second edition)
- b) For Earthquake Protection
6. IS - 1983 (Part 1) "Criteria for Earthquake Resistant Design of Structures - General Provisions and Buildings Part (Fifth Revision)"

7. IS 9226-1993 "Detail Designing of Reinforced Concrete Structures subjected to Seismic Loads Code of Practice, November 1993
8. IS : 4126-1973 "Code of Practice for Earthquake Resistant Design and Construction of Buildings (Second Revision)" October 1992
9. IS : 13824-1993 "Improving Earthquake Resistance of Low Strength Masonry Buildings - Guidelines" August 1993
10. IS : 13827-1993 "Improving Earthquake Resistance of Earthen Buildings - Guidelines" October 1993
11. IS 13055-1993 "Repair and Seismic Strengthening of Buildings - Guidelines" November 1993

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf from an old book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. In the upper left corner, there is a faint, circular stamp or seal, partially visible, which appears to contain some text, possibly "Ship" and "Baker". The page is otherwise empty of any text or markings.

CERTIFICATE
(अनुमति पत्र-132)

(The certificate to be submitted with the application for building permit along with the building drawings and Building Information Schedule)

Certified that the building plans submitted for approval also comply with the

1. Location/Address of Building
2. It is also certified that the structural design including safety from natural calamities including Earth Quakes has been prepared by duly qualified graduate Civil Engineer registered with the Institution of Engineers (India) and is fully compliant with the provisions of the Building Bye-Laws regarding earthquake resistance and the information given in the attached Building Information Sheet is factually correct to the best of my knowledge and understanding.
