

Project Specifications:

- Road Network and Footpaths: Road as per standard specification and as per approved master plan. Footpath will be provided along the road as per road requirement.
- Parks and Green cover: Parks of different sizes as per approved master plan will be made with green cover and trees and entertainment facilities. Tree plantation along road side will be done as per standard specifications.
- Water Supply including Drinking Water Facilities: Groundwater supply through borewells would be stored in water tank, treated and supplied for drinking water. Will connect to government water supply when available.
- Sewer System and Drainage: Sewer system as per approved master plan will be connected to STP. Drains as per approved storm water system plan.
- Water Conservation System: Rainwater harvesting pits at various locations to collect rainwater for recharge. STP treated water will be used for parks and watering of trees.
- Social Infrastructure and Other Public Amenities: Club, indoor and outdoor sports facilities, amphitheatre and parks for social gatherings.
- Safety and Security: Gated township with round the clock security supported by CCTV cameras at prominent locations.
