

### Project Specifications

| S. No. | Development Works                                          | Brief Description                                                                                                                                                                                                                                                                   |
|--------|------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1      | Demarcation of plots                                       | We have one plot of size 4009 sq. mtr.at a prime location in Prayagraj. We are developing 11 plots of different sizes                                                                                                                                                               |
| 2      | Boundry wall                                               | 1.8 m high with 0.75 m parallel wire fence boundary wall is proposed on east wall only                                                                                                                                                                                              |
| 3      | Road work                                                  | From the main entrance gate a 9 m wide Cement Contrete road is proposed through out the project.                                                                                                                                                                                    |
| 4      | Water supply including drinking water supply               | We will provide nagar nigam water mains with pipe line.                                                                                                                                                                                                                             |
| 5      | Sewer system                                               | Sewerage system shall be Provided. All Sewerage water shall be connect with the Nearest Municipal Line.                                                                                                                                                                             |
| 6      | Drain                                                      | Storm water shall be Provided. Storm water from Roads and other landscape area shall be connect to the Storm water drain channel and go to the Rain water harvesting Pit in the proposed park for recharge the Ground water and overflow shall be connect with Municipal drain line |
| 7      | Parks and Tree planting                                    | We will provide 388.82 Sq. mtr. green area and open area in the project                                                                                                                                                                                                             |
| 8      | Design for eletric supply including street lighting        | We will design & implement the system as per local electricity Board                                                                                                                                                                                                                |
| 9      | Treatment and Disposal System of Sewage and Sullage water  | Sewerage system shall be Provided. All Sewerage water shall be connect with the Nearest Municipal Line.                                                                                                                                                                             |
| 10     | Solid Waste Management And Disposal System                 | There is a proper garbage collection area provided for the solid waste management As per Muncipal Guidelines.                                                                                                                                                                       |
| 11     | Water Conservation System                                  | We will suggest to individual to use low flow fixtures as well dual flush cistern and raw water harvesting system to reduce the water consumption and improve the ground water level.                                                                                               |
| 12     | Energy Management System Including Use of Renewable Energy | We will use LED lights fitting in external area and street lights.                                                                                                                                                                                                                  |
