### Brief Descriptions

This is a single plot having 1 total no. of entry gate from 45 mtrs wide front road and 1 no. of exit gate from 12 mtrs wide front road (including nala) and 9 mtrs & 7.5 mtrs internal road.

MS entrance and exit gates are developed with project boundary only.

Metal road with bituminous cover/ high quality concrete pavers/tiles will be used as per design as suggested by architect for internal road.

As per the requirement.

Ground water will be used. End user shall use their individual RO system as per their requirement.

Centralized sewerage system shall be provided.

Storm water system shall be provided. Storm water from roads and other landscape area shall be connected to the storm water drain channel and go to the rain water harvesting pit for recharging the ground water and overflow shall connect with municipal drain line.

There is four lush green parks as per architect plan.

There will be various types of plants as per architect plan.

We have designed the system as per local electricity board along with transformer, HT Panel, LT Panel, Feeder pillar and DG back for common service like external lighting, STP, Pump room etc.

NA

Sewage treatment plant (STP) will be provided as per architect plan.

There is proper garbage collection area as per architect plan for the solid waste management.

A well designed rain water harvesting system as per architect plan shall be provided for parks to conserve water.
